

# Upgrade to Electric Equipment

## and Maximize the Efficiency of Your Commercial Kitchen

If your food service business is running on gas-fired ovens, fryers and griddles, you could benefit from the efficiency, quality and convenience of electric commercial kitchen equipment. Upgrade to electric energy-efficient alternatives, like ENERGY STAR® certified cooking and food storage equipment, to enjoy these great benefits!

**Improved productivity:** Faster preheat, recovery and clean-up times result in faster production.

**Improved quality:** Uniform heat distribution and greater temperature control means a more consistent, quality product.

**Energy efficiency:** Less heat is wasted when using electric cooking equipment, resulting in long-term energy savings and cooler working environments.

**Cost savings:** Electric equipment is typically more cost effective to purchase and install. Plus, lower maintenance costs and more durable, reliable equipment will add to your bottom line over time.

### Additional Incentives Available

If you're thinking about upgrading to electric ENERGY STAR certified commercial kitchen equipment, FirstEnergy's Ohio utilities have a program that can help you save even more!

The **Food Service Equipment Program** offers cash incentives for high-efficiency food service equipment at:

- Grocery and convenience stores
- Restaurants
- Schools
- Hospitals
- Hotels and other hospitality facilities

Contact Sodexo, our program administrator, to apply for rebates!
