

Industry Segment: *Government*

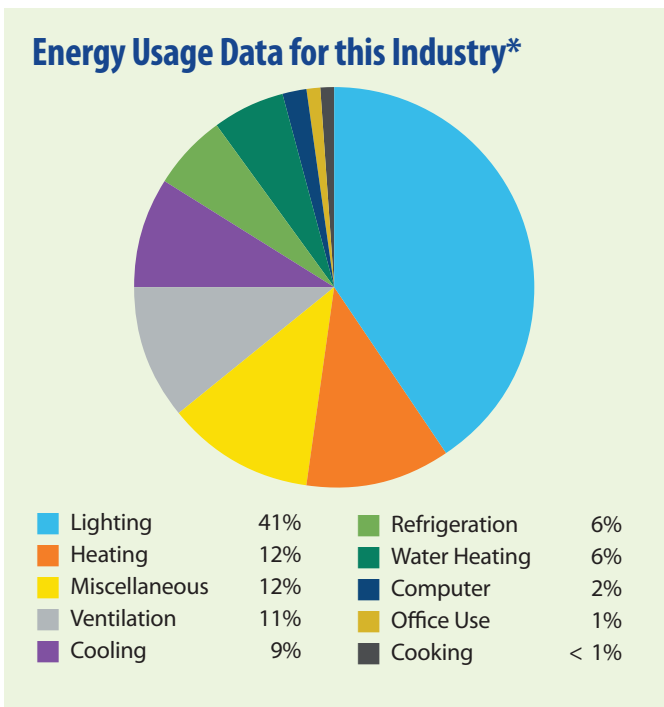

Observations for this Industry

Managing energy consumption is one of the best ways to control expenses in government facilities. By reducing energy demand for lighting, heating and cooling, energy costs go down and you contribute to a greener environment.

Energy Efficiency Solutions for this Industry

- Reduce the number of lamps that are used by retrofitting office fixtures with new advanced fluorescent fixtures that can significantly reduce glare, improve the quality of light and reduce energy consumption.
- Take advantage of natural light on sunny days and reduce office area lighting load when not in use by installing lighting controls, daylight dimmers and occupancy sensors.
- Tune up your facilities' HVAC system to optimize energy performance.
- Install smart power strips to eliminate the standby energy consumption of connected electric devices.
