

Industry Segment: *Hospitality*

Observations for this Industry

Restaurants use the most energy of any commercial building with nearly 80% going to cooking, water heating, refrigeration, heating and cooling. Hotels and motels use most of their energy on lighting, heating and cooling. For the hospitality industry, improving energy performance can reduce costs and increase customer and guest comfort.

Energy Efficiency Solutions for this Industry

- Optimize the dining experience and set the atmosphere by replacing halogen lamps with LED screw-in dimmable lamps.
- Increase perceived light levels and cut energy usage by upgrading outdoor parking areas with LED exterior fixtures.
- Maintain high standards of service while reducing energy costs by replacing commercial kitchen equipment with ENERGY STAR®-certified equipment.
- Improve the customer experience and maximize energy efficiency by installing or recalibrating energy management systems.
- Install HVAC room controls in guest rooms to increase customer satisfaction and potentially reduce related energy use.
- Participate in the Building Operations Training Tuition Reimbursement Program from First Energy's Ohio utilities to increase knowledge of efficient building operations.
