

Retro Commissioning

Save energy and reduce operating costs by re-evaluating and optimizing existing equipment or installing energy management systems to increase energy efficiency.

FirstEnergy's Ohio utilities offer a wide range of incentive programs, including reimbursements for improvements to your facility that increase energy efficiency and reduce electricity consumption.

Possible Retro Commissioning Projects Include:

- Adjustments to lighting and HVAC equipment operating schedules
- Corrections to air side economizer operation and minimum outside air intake percentage
- Repairs to damper actuators and air side economizer sensors
- Central plant optimization
- Compressed air leak loss reduction
- Re-commissioning of compressed air system control

Our **online application process** makes it easy to get preapproval before purchasing new equipment.

Start upgrading your facility today.

EFFICIENCY IN ACTION

Hotel Retro Commissioning Project

Total Cost \$21,273	Incentive \$4,772
Annual Savings 95,446 kWh	Payback with Incentive 1.7 years

Project Description:
This project involved the installation of an energy management system that ensured optimization of lighting and heating controls based on room occupancy.

Hospital Retro Commissioning Project

Total Cost \$126,140	Incentive \$71,878
Annual Savings 1,437,565 kWh	Payback with Incentive 0.4 years

Project Description:
The project scope included the optimization and re-evaluation of room ventilation airflow and needs, applying engineering principals, building codes, field testing, and equipment adjustments.
